MOBILITY PRODUCTS

“The Lifts that Last™”

Butler Mobility products are built and assembled at our manufacturing facility in Lewisberry, PA. Butler Mobility has manufactured wheelchair lifts since 1968.

We produce “The Lifts that Last™” – customizing each lift and installing it into your home, to provide the independence and convenience you deserve. For over half a century, our products have improved quality of life for customers in their homes and businesses through safety, freedom of movement and convenience.

Our wheelchair lifts are designed and manufactured with a strong emphasis on quality, dependability, and especially customer safety. We assemble our lifts with minimal moving parts to ensure low maintenance and reliability for many years of service. It is not unusual for a Butler wheelchair lift to work for 25 or 30 years without service. That’s why they are “The Lifts that Last™”.

Incline Platform Lift

Our Inclined Platform Wheelchair Lifts (IPL) are custom built to your size specifications and needs, and are easy to install and maintain.

Our inclined platform lifts are ADA-compliant and meet or exceed all National Safety Code requirements. All of the electrical components are UL® certified, and the unit requires only standard household current and a dedicated standard outlet.

Butler wheelchair lifts are designed for installation that couldn't be easier or less invasive. The rails attach at the top and bottom of the stairs with no modifications needed to walls. And Butler Mobility's IPL is certified to lift 750 lbs (350 kg) capacity."
